EXTRAORDINARY SCENE.

(From the *European Times*.)

The Bishop of Salisbury had his triennial visitation at Bridport, recently, when there was a large attendance of clergy and churchmen. The Bishop, however, had no time for the vindication of these doctrines—1. That certain men had been entrusted to him by God, as fellow-workers with Him, supernatural powers and prerogatives; 2. that God had been pleased to give to these His ministers the power of so securing the elements of bread and wine as to make them the refreshing body and blood of Christ; 3. that as Christ, the ascended Lord, is ever pleading, so the clergy, men, His ministers, plead the earth which He pleads in Heaven; and, 4. that God, who alone can forgive sins, had delegated them His representatives, the priests and ministers of expression, the fitting to be the propounder of their sins. He proceeded to say that there was a time to speak and a time to keep silence, and he felt that the time for being outspoken had arrived in his diocese, and he had, without any mental reservation, God's leave to do so. He had also received a mandate to communicate to the people of the church for the "sake of souls." He then resumed the reading of the chapter, but, before he had concluded, every churchwarden had left the church, and there were manifest signs of weariness among the clergy. In the afternoon the churchwardens held a meeting, and unanimously adopted the following address to the Right Rev. the Lord Bishop of Salisbury:—

"My Lord.—As churchwardens of the several parishes within your diocese we have this day attended your triennial visitation and heard the charge delivered to you by your clergy. We trust that you have also received mandates to communicate to the people of the church for the "sake of souls."

TELEGRAPHIC MESSAGES.

[FROM OUR CORRESPONDENTS.]

BATHURST.

THOUGH five hours are saved by the dispatch of Western mails by train to the Weatherboard, the time gained is lost in consequence, it is alleged, of no alteration having been made in the dispatch of mails along the line of road, and the coach does not reach here until 1 o'clock in the day—the old contract time. Passengers complain bitterly of the delay. The carrying away of the Rankin Bridge, over the Macquarie, has cut off from communication with Bathurst one of the largest agricultural communities in the district, and great distress prevails amongst the small farmers, who are wholly dependent upon wood-cartering for subsistence during the winter months. The bridge itself is lying intact, almost about half a mile below its old site, on a sand bank, whither it was carried by the flood. It would cost very little to replace it in its old position, or it is perfectly sound, but if there be delay it may be carried away altogether with the first fresh in the river, and the country will be put to an expense of two or three thousand pounds in building a new one, for it is on the direct road to the lower Taron and Tambarora.

ADELAIDE.

SATURDAY, 4 P.M.

The Executive Council met again to-day at 3.15, to deal with the charges against Justice Boothby. The learned Judge attended, and asked for further time to consider the evidence adduced against him. He stated that he did not read such documents on Sunday, and consequently taking into account the time he had been obliged to devote to his judicial duties he had only had about five and a half days in which to read the voluminous minutes that had been placed in his hands, comprising cases and extracts mashed from newspapers extending over ten years. His Honor also asked to be furnished with the names of the lawyers who had signed a request asking the Government to appoint a Primary Judge in Equity. His Honor was granted till Monday, 29th July, to consider the evidence, and make his defence, and it is thought that on that day the case will be closed on both sides, and the Executive will come to a decision.

RELIGIOUS EQUALITY OR INTOLERANCE.

To the Editor of the Herald.

In looking over a file of the Times for February 18, I find that the Spanish correspondent of that journal draws a comparison bearing the signature of Primo, which was posted all over the city of Madrid. The following is extracted from it. The penalty of death is incurred.

" Against every individual who shall direct, edit in, or print clandestine papers against religion, the Queen, the public order, the security of the State, and the independence of the Empire, &c. Against every individual who shall defend it, intellectual, material, or auxiliary aid in carrying out such publications. The party or party to whom it is to be brought before a competent court, who shall proceed summarily to try and condemn the delinquent person, conformably to the present legislation."

This seems to confirm the argument in your article of the 29th, concerning the different phases presented by those who praise the Roman Catholic faith.

THE COLLECTIVE WISDOM OF NEW SOUTH WALES.

I.—
"I am a stranger in the House."—Newspaper reporter [COMMUNICATED.]

A HEAP of anything, no matter what, if it consist of substances of different weights and sizes, will not, if it be set in motion, take a finally settled position until after it has been shaken up for a time at least. Thus a truck of coals travelling by a railway line will have to pass over a mile or two before it shakes down into comparative quietness. A big truck starts up here, a small truck rolls down there, and the dust certainly caused by some gradations works its way to the bottom. After this process has been gone through, the lot travels along easily enough, and there is no change except when a jolt rather harder than common disturbs the adjustment, and topples down some of the higher and more pretentious pieces.

It is so with the Assembly. During the first five days of sitting, there was a kind of political jumble. Members are thrown into, and shoulder themselves into, positions of prominence that they would not care to occupy—but like the smaller lumps on the coal truck, they have been rolling down one by one with every jolt, and have since been gradually assuming the lower level which more befits their intrinsic consequence. The process, however, is still only going on, and it will probably be the end of next week before I shall be able to see more clearly than I now do the relative rank in the House of hon. gentlemen. The result will be to bring the members of the Legislative Assembly into a condition of comparative equality, and to do penance for the sins of the past. The members of the Legislative Assembly will be equal, and the members of the Legislative Council will be equal, but the members of the Legislative Assembly will be more equal than the members of the Legislative Council.

THE NEW SOUTH WALES COURT IN THE PARIS EXHIBITION PALACE.

Commissioners' Office,
Colonial Secretary's Department,
Sydney, 13th July, 1867.

GENTLEMEN.—By the desire of the above-named Commissioners, I have the honor to enclose you a copy of the enclosed official document received by the yesterdays mail from England and France, in reference to the New South Wales Court in the Paris Exhibition.

I have the honor to be, Gentlemen,
Your most obedient servant,

A. G. GULAY,
Secretary to the Commission.
Editor of the Sydney Herald.

Paris, 16th May, 1867.

The Hon. T. A. Murray.—I am still here, but intend to leave for England on the 18th. I shall do so with much regret, as it would be of much advantage to remain at the exhibition to render information to the many inquiries respecting our exhibits, and the colony in general; and it has been, as far as possible, to find any ready-made persons to replace me for a short time, and then return here. You will, I feel assured, be pleased to learn that our court is attracting much attention, and now that it is finished, looks remarkably well. It is beyond comparison the best of the Australian Courts, and I think, the best of the Courts in the world. The Sydney Court, to which, in interest, it is certainly not inferior, although smaller. That this is the general opinion will be gathered from other sources—at least I think so. I have managed to bring up nearly everything, &c., from the colony—only two or three articles have been published, and I hope to replace them by others, and then return here.
